SL20SV SLIDING CONTROL

Uni-Blinds®

Innovation comes built-in

SLIDING VENETIAN CORDLESS CONTROL

The SL20SV integrated Venetian blind provides a smart solution for any window and door with its clever slider controlling all the blind functions in one easy device.

Based on the technically superior Screenline® integral blind system from globally renowned manufacturer Pellini, the SL20SV provides a slicker overall visual result with no cords on the face of the glass. Like all Screenline® blinds, the SL20SV sliding system represents the highest quality and operational reliability of any integral blinds.

The blind is encapsulated within the two glass panes of a double glazed unit, with thermal efficiency optimised thanks to a warm edge spacer bar as standard.

BENEFITS OF THE SV SYSTEM

SV System: The Benefits

- Closed-loop belt transmission system allows a smooth and long-lasting function of the blind
- External magnetic slider is treated with the Sanitized® patented antibacterial finish, providing a long-lasting protective function
- Patented warm edge spacer bars and a premium quality plastic side profile combine to maximise energy performance of the insulating glass unit
- Fully compliant with child safety standards
- Requires only one device to raise and tilt the slats

HOW THE SL20SV OPERATES

The SL20SV is operated by a cleverly-designed magnetic slider, placed on the right or left-hand edge of the glass. A narrow adhesive transparent profile ensures the linear movement of the slider. The blind is raised and lowered by moving the slider up or down and is tilted by slightly lifting or lowering the same slider.
